

Metzner Alchemical Divination®

*Sponsored by the Green Earth Foundation
Presented by Ralph Metzner, Ph.D.*

The *Metzner Alchemical Divination*® practices have been developed by Ralph Metzner on the basis of extensive experiential research on altered states of consciousness. They have been applied and tested over the past twenty years in the contexts of psychological work with individuals and groups. This is the first time they are being taught for those wishing to learn to use them with others as well as themselves.

Divination is practiced in many traditions and is generally recognized as a process of obtaining intuitive spiritual insight. In essence, it involves a structured inquiry into questions of the past, for healing and resolving problems, or the future, for visioning and obtaining guidance. Alchemy is the ancient art and science of elemental transformation, which in modern times was re-interpreted by C.G. Jung and his followers as psychospiritual transformation using symbolic or imaginal processes. Combining these two ancient traditions with a unique blend of contemporary depth psychology and shamanistic spirituality --

The *Metzner Alchemical Divination*® practices are rooted in:

- * transformational teachings of psycho-spiritual alchemy
 - * core East-West teachings of humans as multi-dimensional Being of Light
 - * shamanistic principles and practices of connecting with the Spirits of Nature
 - * a scientific systems worldview describing the interconnected Web of Life

The basic purpose of these divinations is to help individuals obtain deeper experiential understanding, problem resolution and visionary inspiration for their life path in its intrapsychic, interpersonal, professional, creative and spiritual dimensions.

Participants in the alchemical divination training program can expect to:

- * Gain greater theoretical understanding of the psychology of transformation, as described in spiritual and esoteric traditions and in the mythologies of ancient cultures, as well as the perspectives of transpersonal and depth psychology, and ecological systems thinking.
- * Learn yogic meditative techniques of channelling light-fire, toning, and breathing to amplify awareness, sensitize perception, purify the human energy field and navigate through ordinary and non-ordinary states of consciousness.

Metzner Alchemical Divination® is a registered trademark.

- * Benefit from the divinations personally as well as learn how to conduct divination ceremonies with individuals and in groups; and learn methods for integrating the insights and changes generated from the divinations into one's life and practice -- using methods such as drawing, expressive movement, sounding and story-telling.

Structure of the training program:

The basic divination training is offered in three 5-day modular workshops, that can be taken in any sequence. In these workshops, participants will experience the divinations for themselves as well as Agni Yoga meditations; and they will practice guiding them for others in dyads and small groups. (Note: The divinations are educational and are not intended as a form of psychotherapy or treatment for any conditions.) The three workshops are:

Janus and the Gateway of the Heart (includes the following divinations and others.)

- * Finding your Orientation and Inner Direction
- * Releasing Blocks on Receiving and Expressing
- * Connecting and Reconciling with the Ancestors

Practical Applications:

Areas in which these teachings and practices can be, and have been, applied and integrated include: psychotherapy, hypnotherapy and counseling; bodywork and various forms of energy healing; life coaching and professional development; organizational development, leadership training and team building; programs for the enhancement of creativity and intuition; college courses in consciousness studies; educational programs for youth and adults aiming at increased self-awareness, and others.

Ultimately, the use of these meditative divination practices can lead the individual to a deeper awareness and appreciation of the interconnectedness of all life on Earth and the vastness of the multidimensional Universe in which we live. From this can come a strengthened commitment to protect and preserve the precious beauty of life in all its myriad forms and mysteries.
